

ABSTRACT OF THE DISCLOSURE

A sealing cover for the upper beam of blinds is made up of a blind, a sealing cover, and a decoration piece wherein the blind has an upper beam, and a blind embodiment of a Venetian blind, a fabric drapery, a bamboo shade, a Roman blind, or a folding blind, etc. attached to the bottom of the upper beam thereof. The sealing cover has a coupling section disposed at one side to be engaged with a coupling hole disposed at both ends of the upper beam respectively. The other side of the sealing cover is disposed a dovetail fixing block with a stop flange extending transversely at the bottom thereof to which a dovetail fixing groove disposed at one side of the decoration piece is led from the top to bottom till abutted against the bottom stop flange thereof, securely locating the decoration piece onto the upper beam thereof. A decoration article attached at the other side of the decoration piece can be variously changed in a do-it-yourself manner matching to the blind embodiment of different types, increasing the unique texture and the visual beauty of the blinds in display as well as boosting the competitive power of the blinds thereof in the market.
